

Missing work
again...and girls'
night...I just want
my life back!

ENDOMETRIOSIS PAIN?

Don't suffer in silence. We hear you.

Maybe you're experiencing some of these symptoms:

- Pain 1-3 days before your period
- Pain that is regularly and severely disruptive to your life
- Pain with intercourse, even when not during your menstrual cycle
- Pain during or after bowel movements or urinating
- Pain with sex, especially in certain positions or during orgasm

Endometriosis: Pain That's Not Normal

Endometriosis is the most common gynecologic condition to cause chronic pelvic pain. It's a leading cause of infertility. But there's good news: Endometriosis is treatable. And you're not alone. You're not crazy. You're not overreacting. You're not alone.

If you suspect you may have endometriosis, get help immediately. If you don't believe you're affected, get some help. You're not crazy. You're not overreacting. You're not alone.

To learn more or to see if you may qualify for help, visit the Endometriosis Society at www.endometriosisociety.org
