Endometriosis Pain Clinical Research Study

The Edelweiss study is for women living with moderate to severe pain associated with endometriosis. Dealing with symptoms that others might not understand can be frustrating, but you're not alone. About 450 women are expected to participate in the Edelweiss study.

If you complete the study, your participation will last approximately 15 months and include up to 16 scheduled visits to the study clinic. You will be reimbursed for your time and travel expenses.
