

Step 1: In general, to enter the user ID for a customer to use, **MSB**, the user's password **MSBpassword** is used.

Step 2: To get the ID number, use the digital code. If the correct number is not, all of the digital codes are downloaded.

1. Select the account for the card.
2. Select the account from the account information for the card for the card.
3. Find the "Account Number" or "Card Number" if the account information for the card is not available.

4. Select the card number - automatically add the ID number to the card.

MSB - The mapping of the system number "MSB" within the account number is handled by the processor within the business system.
