hopeful additional direction out soon. <u>See attached</u> for how-to on Telehealth document in NextGen.
However tele-communicate, can charge appropriate E&M and add '02' place of service and '-95'
modifier (which the NextGen template does for you)

3. Providers – if not getting these updates via text to click on, be sure to unblock phone number 801
784-4178 which is the number from which these are sent (which means you aren't getting THIS one

either so someone may have to tell you that). Employees - updates come from 888 416-1783 so be

2. Telehealth visits are now 'okay' via FaceTime and Skype. Still also testing out other platforms with

- sure to unblock that number.
 Intermountain COVID referrals if sending patient to Layton Intermountain hospital for testing, be sure to use the <u>attached</u> "Intermountain Central Laboratory" form and fax to 801 543-6076. They say testing is compromised if not accompanied by that form.
- 5. Well visits no clinic-wide direction to curtail well-visits, even with elderly population. At this point, patients and docs will choose their own course with this.
 6. Sick/Well docs Urgent Care Layton and Westside, day and night, divide their providers into those
 - treating COVID-car/respiratory patients (in full PPE all day see treatment protocols below) and those treating all other Urgent Care patients.

 7. The triang and testing protocol have been undated. Please see attached.
