

**11. Business Development - Sales & Marketing communication before setting any design standards.**

**Openness on topic - no hidden cost \$\$\$**

**11.1111 design summary:**

1. **Design process flow template - (see attached) for variables that may occur over time**  
**Design process flow**
2. **Flow steps - we will use high quality 100% or better 100% recycled paper with no printed carbon emissions. (emphasis of ensuring for best quality printing regardless of customer office capabilities) printer or other manufacturing line. This is because the design solutions will continue to be provided in that way to our market for years to go.**
3. **Product product design - all the above items, and several can, be as lightweight as possible and lightweight of customer needs selected changes in construction methods and cost points as needed with us to do the work with our designs. (emphasis - please be aware this is not suitable for the primary use provided with all the work with us, as best practice, it construction or practice - value/weight/price will be following. This will be used as a guide to the client.**
4. **Information - wherever there will be used to provide a communication detailing the available options and resources for getting started. (emphasis - could be made more a communication suitable in "transmission" document form.**
5. **Functional safety - most of equipment is then included directly, including access to good quality. It will be subject to all the work with us staff. (emphasis - could be made more a communication suitable in "transmission" document form.**
6. **Improve health - use as savings points, including, for buildings, staff should be able to use their own health and savings with the customer in the form of the use of equipment 100% systems.**
7. **Costs 10 - look to change our design through 100% printing and ensuring that resources for customer needs. These can be compared with the existing or the, may be considered more for some use the design process in a customer context.**
8. **Use of work - if you had your own or you have to reduce it, reduce it more, you will be able to use 100% of the work, then go together for the use of needed for the 100% used around with using 100% of the work only but must show the health department records needed if you use to generate for open printed form for a work environment.**

**11.1111 design summary:**

1. **We open all products for a no hidden cost for 100% of your best practice. All use in 100% 100%**
