

1. Access the Contagion Exposure Risk template located above the Tabs in the patient's chart.

The screenshot shows a top navigation bar with tabs: Case Type (highlighted), Contagion Risk (circled in red), and ICD. Below this is a secondary navigation bar with tabs: Specialty (Family Practice), Visit Type (Office Visit), Intake, Histories, SOAP, Finalize, Billing, and Checkout. The 'Contagion Risk' tab is the active one.

2. Select the Contagion Exposure from the grid

A screenshot of a 'Contagion Exposure History' grid. On the left, there is a dropdown menu labeled 'Exposure' with options like 'Travel to high risk areas', 'Antivirus', 'Bird Flu', 'Cholera', 'Corona Virus 2019 - nCoV' (selected), 'Ebola', 'Tyre Disease', and 'Measles'. A red arrow points to this dropdown. To the right is a detailed form with fields: Exposure (Corona Virus 2019 - nCoV), Incubation (7-14 days), Exposure date (01/05/2020), Travel arrival (01/18/2020), Travel departure (01/18/2020), Duration of exposure (13 Days), Risk (some risk), and a checkbox for 'Patient declines to answer'. Buttons at the bottom include 'Add', 'Update', and 'Remove'.

3. Add the exposure information to the fields

- If the patient declines to answer, the check box can be clicked and all the other fields will be inactive
- The URL will open up to the CDC website for more information
- Clicking the 'Detailed document' will enter the information in the Master Document

4. Click Add

- All the information will now be in the Contagion Exposure History Grid
- The star indicates an active exposure

5. Click OK

Contagion Exposure History

#	Exposure	Risk	Where	Exposed	Arrival	Departure	Duration	Incubation	Ex
*	Corona Virus 2019 - nCoV	some risk	China	//	01/05/2020	01/18/2020	13 Days	7-14 days	

The risk badge will have a number indicator
