Lyme Disease						
Malaria						

3. Add the exposure information to the fields

- If the patient declines to answer, the check box can be clicked and all the other fields will be inactive
- The URL will open up to the CDC website for more information
- Clicking the “Detailed document” will enter the information in the Master Document

4. Click Add

- All the information will now be in the Contagion Exposure History Grid
- The star indicates an active exposure

5. Click OK
