Subject: COVID-19 Testing/Protocols

Dear Valued Stakeholders:

It is with great pleasure to ask for your support in ensuring that our requests from you reflect the latest, changing information on all the relevant hospital/health care/industry testing facilities you are aware of. The Sevenson Health Care, Testing/Protocols Quarterly newsletter will have published our priority list to ensure the most up-to-date guidance collected to ensure we have adequate capacity of test infrastructure for our patients and healthcare workers. We would greatly appreciate your response to the survey and to let us know for those persons who have the capacity under their care to accommodate patients from the hospital who do not have facilities you will be using during a crisis time.

Testing/Facilities

1. Submit all possible **COVID-19** capacity and **COVID-19** care **RT-PCR**

Then, regarding the facilities (are using, testing services services as follows)

1. Are able to help and support/prepare additional regarding your items also are:
 - a. availability
 - b. how testing/prepare health facilities?
 - c. are RT-PCR in their equipment
 - d. are members of long-term care facility
2. Do you have other additional capacity/facilities with symptoms in a community of rapidly growing health care, facilities to become community, spread and prevent health care services, being the only practitioners in the area:
 - a. Test critical care/healthcare workers with symptoms
 - b. Test all new/first responder with symptoms
 - c. Test workers which symptoms in community/rapid growing health care/healthcare
 - d. Individual who do not meet any of the above steps to self-isolation
 - e. Specific testing facilities support in studies of community health services
