How "Open Day Research" could be an interesting way of implementing a project in the classroom

What are the main findings for teachers for didactic implementation purposes?

1. An all-round project only allows for a limited range of collection themes or a limited range of subjects which then need to be worked on.

Implication: The research activities are divided into smaller segments in classroom based on the content area. It is a good way to design a sequence of modules. Teaching materials need to be prepared in advance, as well as the time for the project.

2. The project is suitable for the content area which is being used. **NOTICE:** The teacher will be the only one doing the project. The teacher will not be able to do the project in the classroom. The teacher will be the only one doing the project in the classroom.
3. The project is suitable for the content area which is being used. **NOTICE:** The teacher will be the only one doing the project in the classroom. The teacher will not be able to do the project in the classroom.
