

WHAT ARE WE DOING TO ADDRESS THE POTENTIAL MEDICATION SHORTAGE?

1. We will temporarily only allow up to a **30-day supply on medications that are in short supply or anticipate to be in short supply and NO early refills.**

Explanation: Pharmaceutical wholesalers are allocating medication shipments to pharmacies based on historical usage in an effort to prevent long-term disruptions of supply chains. Therefore, in order to work within these allocation limits, we will implement these policies temporarily.

- It is important to note that the current supply chain is functioning under **NORMAL** conditions with the only major change being consumers' behavior. The issue with toilet paper supply is a good example of what we are attempting to prevent.
- We are aware that insurance companies are promoting early fills and 90 day supplies but this is without regards to the strain it will impose on the supply chain. Wholesalers have instructed us to act otherwise to ensure medication supply for as many patients as possible.

WHAT ARE WE DOING TO PREVENT THE SPREADING OF COVID-19?

1. All of our pharmacies will offer **curbside assistance.**
2. All of our pharmacies will continue to offer **home delivery** in Davis and Weber counties.
3. All our pharmacies will **remain walk-in open** to the public until the situation directs otherwise.

WHAT CAN YOU DO TO HELP US WITH OUR EFFORTS?
