

Tanner Clinic TeleMedicine Option 3-24-20

Dear Providers,

After a review of several options, we recommend Doxy.me as your telehealth platform. Other platforms may develop for us and be introduced later, but Doxy is easy to use for both provider and patient and takes only about 5 minutes to set up. As with others besides NextGen itself, it is NOT integrated with NextGen. However, with Phreesia online check-in, that is not really an issue. You will need to do all documentation in NextGen. In fact, the hope is that a Telemedicine visit mirrors pretty much that of an in-person exam room visit – just different.

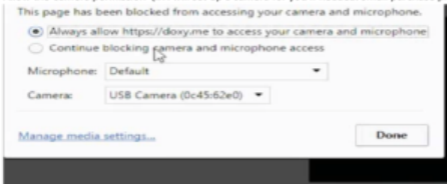

TO REGISTER:

1. Go to doxy.me (wouldn't hurt to watch the short "Watch our video" clip)
2. Click the "Get started- for free" button
3. Enter your information. As the patient will receive Televisit invitations from your "Room Name" it is probably best to name it with format DrFirstLast with modifications as needed (It will tell you if someone else is using that name)

The screenshot shows the 'Sign Up' page on doxy.me. It features a dropdown menu for 'Dr.' with a downward arrow. Below it are four text input fields labeled 'First', 'Last', 'Dr', and 'Dr', each with a light blue background. Underneath these fields is a text input field containing the URL 'https://doxy.me/Dr'. At the bottom is a text input field for an email address, with the placeholder text 'YourEmail@provider.com'. A mouse cursor is positioned over the email field. A small blue and green icon is visible at the bottom right of the form area.

4. Allow the Camera permission (I.T. will set up a camera for you if needed. Small purchase price cost-accounted)

The screenshot shows a Windows notification for camera and microphone access. The text reads: 'This page has been blocked from accessing your camera and microphone.' Below this are two radio button options: the first is selected and labeled '(Always allow https://doxy.me to access your camera and microphone)', and the second is unselected and labeled 'Continue blocking camera and microphone access'. Below the radio buttons are two dropdown menus: 'Microphone:' set to 'Default' and 'Camera:' set to 'USB Camera (0c45:62e0)'. At the bottom left is a link 'Manage media settings...' and at the bottom right is a 'Done' button.
