

After a review of several options, we recommend Doxy.me as your telehealth platform. Other platforms may develop for us and be introduced later, but Doxy is easy to use for both provider and patient and takes only about 5 minutes to set up. As with others besides NextGen itself, it is NOT integrated with NextGen. However, with Phreesia online check-in, that is not really an issue. You will need to do all documentation in NextGen. In fact, the hope is that a Telemedicine visit mirrors pretty much that of an in-person exam room visit – just different.

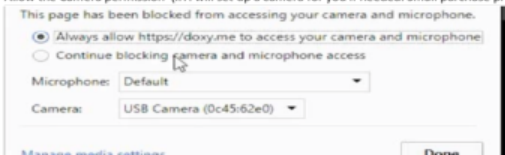

**TO REGISTER:**

1. Go to doxy.me (wouldn't hurt to watch the short "Watch our video" clip)
2. Click the "Get started- for free" button
3. Enter your information. As the patient will receive Televisit invitations from your "Room Name" it is probably best to name it with format DrFirstLast with modifications as needed (It will tell you if someone else is using that name)

The screenshot shows the 'Sign Up' page on doxy.me. It features a vertical form with the following fields from top to bottom: a dropdown menu for 'Dr.', a text input for 'Holy', a text input for 'Week', a text input for 'DrWeeks', a URL input containing 'https://doxy.me/DrWeeks', and an email input containing 'YourEmail@provider.com'. A mouse cursor is pointing at the email field. At the bottom right of the form, there are three small colored dots (green, yellow, red) indicating a progress indicator.

4. Allow the Camera permission (I.T. will set up a camera for you if needed. Small purchase price cost-accounted)

The screenshot shows a system dialog box with the following text and controls: 'This page has been blocked from accessing your camera and microphone.' Below this is a radio button selection: the first option is selected and reads 'Always allow https://doxy.me to access your camera and microphone', and the second option is 'Continue blocking camera and microphone access'. Below the radio buttons are two dropdown menus: 'Microphone:' set to 'Default' and 'Camera:' set to 'USB Camera (0c45:62e0)'. At the bottom right, there is a 'Done' button. At the bottom left, there is a link that says 'Manage media settings'.
