

Rocky Mountain Allergy at Tanner Clinic

As an effect of the new guidelines, we will follow the course of the approved (2020) U.S. and are making the following recommendations in your allergy shot series:

Options are:

1. **Build up faster:** Come to our program more often and receive half of dosing until another 2 weeks.
2. **Maintain on plan:**
 1. Don't have maintenance in the last 2 weeks, then do not come in for another 4 weeks.
 2. Don't have maintenance in 1st week, then come in and get a shot and then do not come back for another 4 weeks.

These guidelines were developed to help our patients maintain their health.

Most clinic hours were across T-Block and 18-Block Monday through Friday and other times to allow discontinuity.

These changes are all approved by our local regulatory authorities. If you are not well from allergy, you have, symptoms of trouble, or anything suggests something is not right, please do not come into clinic. If you have decided to come in but a fever actually appears, please do not come into clinic.

We appreciate everyone understanding and your patience. The best thing people need to be doing is continuously coming to a clinic whether having to wait there in a room that isn't great. It is more efficient and things are going to be few weeks and things are going to be better in general. It is important that we understand just so that all our resources are being used correctly to take care of people.

And thank,

Rocky Mountain Allergy at Tanner Clinic staff
