

different.

Though slightly conservative, we are happy with this week's distribution. With reduction in productivity this last month, however, and expected continuance there is obvious concern for the July distribution, as evidenced by the reduction in draws to help prepare for it. The Board met this morning to hash some of that out, but there is still so much unknown. We will plan on putting out a more descriptive letter in a couple of weeks when productivity is more predictable and hoped-for changes in opening up medical services are more sure.

In the meantime, below is a summary of the government COVID funding options that we have all been hearing about and how each applies to Tanner Clinic. This is a more detailed version of what went out to the general clinic on today's COVID update. We are happy that there ARE some financial options for us and feel we are on top of taking applicable advantage of them.

Thanks

Steve and Theron and the Board

Tanner Clinic COVID relief funding options						Status @
	Applicable to Tanner	Grant/Loan	Am't	Process	Monday, April 13, 2020
