

## Dear Treasurer/Dean,

It is an honor to represent UCSD and working together with you to provide financial support for a graduate degree in genetics in the near future, not an immediate challenge as an M.D./Ph.D. program you can be more flexible. We will no longer continue without funding at UCSD Hospital.

Please advise whether you have received funding from a UCSD institution that allows you use the value and the corresponding flexibility to the donor, or the UCSD Hospital.

Should the UCSD Hospital provide funding, please advise how you would like to proceed. Please advise us how you would like to proceed with your financial support by using a combination of your financial contribution for use in the Department of Genetics at UCSD for the program and provide financial support to the UCSD Hospital depending on the financial contribution.

Thank you for your continued partnership with and support of the Department of Genetics at UCSD. We are grateful for the opportunity to partner with you to provide the support and M.D./Ph.D. program in genetics and to be continuously in contact.

Best wishes,

Dr. Robert H. Miller  
Department of Genetics  
UCSD Hospital
