

Managing HCC Codes in the Problem List

The pill tabs at the top of the Patient Information Bar (also at the bottom of the appointment list) provide a great way to take a quick look at your patient.

This is only valuable if the lists are kept current. Only active chronic problems should be on the drop-down lists you see when you hover over one of the pill tabs.

Problem Description	Onset Date
Bacterial vaginosis	11/29/2016
Abnormal finding on evaluation procedure	11/29/2016
Caregiver annual health check	11/29/2016
Aching headache	11/29/2016
O/E patient feels well	11/29/2016
Contraception care education done	11/29/2016
Counseling offered	11/29/2016
Itching	11/29/2016
Attended breast screening clinic	11/29/2016
Postpartum state, 8 weeks	11/29/2016
Barrier contraception method	11/29/2016
Routine gynecologic examination done	11/29/2016
Mantoux: negative	11/29/2016
Abdominal pain, acute	08/08/2016
Chronic abdominal pain	08/08/2016
Chronic generalized abdominal pain	08/08/2016
Constipation, unspecified constipation type	08/08/2016
Use of condoms for contraception	08/08/2016
Amenorrhea, secondary	08/08/2016
Pruritus of genital organs	08/08/2016
Cervical cancer screening	08/08/2016
Vaginal discharge	08/08/2016
Vaginal itching	08/08/2016
Vaginal odor	08/08/2016
Vulvar itching	08/08/2016
Pruritus of skin	08/08/2016
HIV	

Sometimes a patient’s chart shows items on the problem list that don’t make sense. It is an easy mistake to add all diagnoses to the problem list when adding a dx. Or, it may have been a problem in the past, but is no longer a concern (i.e. high-risk pregnancy after baby is delivered). Problems are often chronic conditions, but may also include things a Clinician thinks is important to monitor or make other Clinicians aware of (ie. Complex care needs) Problems are not typically screenings, well visits, etc ...

The Problem List is managed through the Problems Module. If you click on it will open to the problem list. Active problems will display first, followed by resolved.

Description	Fully Specified Name	Chronic	Secondary Condition	Problem Status	Recent Note	Last Address
Obesity	Obesity	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Active		
Abdominal pain, acute	Acute abdominal pain	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Active		
Chronic abdominal pain	Chronic abdominal pain	<input type="checkbox"/>	<input type="checkbox"/>	Active		

To clean up the problem list and remove duplicates, or problems that are no longer accurate, highlight the problem you wish to resolve. **NOTE: you can resolve multiple problems at once by holding down the Ctrl key and then selecting all you wish to remove.**

Once problems are selected to remove, click on Resolve. Answer Yes to the pop-up. Problems will move to resolved. If you are resolving a single problem from the list, highlight, click Resolve, then click on Accept in the bottom section (there will be no pop-up).

Concept Id:
 Description: Fully Specified Name:

Onset Date: 09/09/2016 Resolved Date: 01/03/2017 Last Addressed:
 Resolved By: Resolved Reason:
 Problem Status: Clinical Status:

Date will populate with current date (date can be changed manually).

NOTES: The key to how you view the Problem List in the module is done through Preferences . You are not able to clean up problem list if you are on a locked encounter.
