A new text box will be added below the E&M codes as an option to document the amount of time the provider spends with the patient or documenting the encounter on the day of the encounter. This information will be added to the master documentation, if filled in. The provider may also (or instead filling in the box) document the amount of time spent in their note.

The Preventative Counseling and Consult codes will be located on the Additional E&M Codes template (link above the 'Submit E&M Codes').
