

Speech-to-Text Options

Dragon

Dragon (subscription) - \$120/provider/month (3 year term)

- Cloud-based – all settings, preferences, macros and processing are done on servers in the cloud
- Always up to date
- Used by hospital (I believe but have not been able to confirm)
- Changes available everywhere
- Should work from home

Dragon Medical (boxed set) - \$1600-1800/provider (one time until next upgrade wanted)

- Machine-based – all settings, preferences, macros and processing are done on the local machine
- Must make changes on each machine, if multiple machines are involved (i.e., office and home)
- Upgrades cost (\$500+ per upgrade)
- Will not work from home across Citrix

Fluency Direct

- Part cloud-based, part machine-based – all settings, preferences, macros, etc. are stored in the cloud but all processing is done on the machine level
- Can install on any number of machines – based on provider login
- Will work from home across Citrix
- Olympus mic (sold separately - \$300) - recommended but has been used with the cheaper mics the clinic supplies

Pricing Models

- Subscription – approx. \$85/month/provider (3 year term)

NextGen Mobile Plus

NextGen Mobile Plus

- \$99/mo (4 year term) + a one-time setup fee per provider (\$175)
- Includes speech-to-text, which integrates into the provider documentation
- Dictation and virtual scribe visits are an additional costs:
 - Additional cost per line for dictation/transcription
 - Virtual Scribe - \$5.00/visit on top of the \$99/mo
 - No additional costs for speech-to-text
