

A blurred background image of a medical professional in a white lab coat and glasses, working at a lab bench with various pieces of equipment.

There's a new option for patients to make a lab appointment!

You can help reduce wait times at the lab and encourage patients to make an appointment instead of arriving as a walk-in

- Appointments can be set up by MA's during provider visits to help reduce wait times at the lab.
- The lab will continue to take walk-ins, but wait time will be shorter with an appointment.
- When possible, appointments should be made 3 business days in advance.
- If lab work is ordered, but not collected during a visit with a provider, an MA can schedule patient's lab appointment before they leave.
- Patients will be sent a preregistration link on their phone and a reminder of their appointment.

For now, this is only at our **Layton location**. Patients can call **(801) 773-4865** to schedule a lab appointment.
