## Laser Hair Cemoural

and Electrolysis

## Laser Hair Removal:

- Long-term hair removal
- Can be done anywhere besides the eye area

Laser Hair Removal and Electrolysis

- Little to no recovery time
- Multiple treatments may be needed
- New hairs may still grow, but they grow in finer and lighter in color than before

## Electrolysis

- Permanent hair removal
- Can be done anywhere on the body
- Disrupts hair growth
- Multiple treatments may be needed
- Epilator device is inserted into skin and uses shortwave radio frequencies into hair follicles to stop new hair growth

Offered by our Esthetician Team
